

Department of Artificial Intelligence and Data Science, Stanley College of Engineering and Technology for Women organized GenAI Forge Hackathon

A power-packed Generative AI Bootcamp and Hackathon in association with SmartBridge.

Bootcamp: 23rd – 26th

Offline Hackathon: 27th & 28th

Over six intensive days, participants explored cutting-edge concepts in Generative AI, worked on real-world problem statements, collaborated in teams, and transformed ideas into impactful solutions.

Highlights:

- * Total Student Registrations: 420
- * Teams Formed: 92
- * Students in Teams: 362
- * Total Git hub submissions : 281
- * 10 Teams were shortlisted for the Second Round

Three winners were selected, with the first-place winner being Pressure_Predictors for their outstanding solution.

Congratulations to all participants for their incredible efforts! A heartfelt thanks to SmartBridge, our faculty coordinators, mentors, and organizing team for making this event a grand success.
